

THINK GREEN

FOR YOUR *dream* HOME.

Turn your *Dream Home* into a *Green Home*. Go Solar today!

- Lower your electric utility bills for months and years to come!
- Increase the value of your property without increasing your property taxes.
- Energy prices are forecasted to rise so a solar electric system provides you increased long-term savings.
- Reduce your energy dependency by generating your own electricity using the free energy of the sun.
- Protect the environment, reduce greenhouse gas emissions and global warming, or reliance on fossil fuels by using photovoltaic solar panels.
- According to studies by the National Appraisal Institute, "homes with solar power typically appreciate 20x's the system's annual savings!"
- Contribute to a cleaner environment and improve the air quality by using photovoltaic solar panels as a renewable source of energy.
